

Exterior Paint Colors

Pre-Approved Palette + Architectural Review

A simple guide for Peacock Gap homeowners

August 2026 | Page 1 of 3

A convenient option, not a requirement

Homeowners are not required to use these colors. The pre-approved palette is simply intended to make the review process easier for homeowners who would like to select from colors that have already been reviewed and approved.

How the Approval Process Works

[Submit an Architectural Review Request](#)

1 Submit

Submit every exterior painting project through HOA Architectural Review before work begins.

2 Select

Select a pre-approved color, another proposed color, or a previously approved color.

3 Approval

Pre-approved colors receive automatic approval. Other colors are reviewed by the committee.

Borrow the PGHOA Color Ring

Borrow the PGHOA Color Ring. The PGHOA maintains a physical color ring containing all of the colors in the Pre-Approved Exterior Color Palette. Homeowners are welcome to borrow the color ring to assist with their decision-making process and compare colors at their home under different lighting conditions. Please [contact us](#) to arrange to borrow the color ring.
